Product Description

The Audi Quattro A2 is a true legend of racing. The TAMIYA model has a completely new developed body and comes with a TT-02 chassis. The Quattro A2 was used in the 1983 WRC Rally season, driven by Hannu Mikkola. The kit includes a powerful Torque Tuned engine and an electronic speed controller. The TT-02 chassis has four-wheel drive and independent suspension. Required accessories: Remote control with receiver, steering servo, 7.2V NiMH battery pack, charger, paint for polycarbonate body (TAMIYA PS-)

WARNINGS:

Before you start assembling, make sure you have read and understood all instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), observe and follow the instructions enclosed with them. Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads.
