300056352 - RC Car, 1:14 RC MB Arocs 3363 6x4 ClassicSpace

from **418,83 EUR**

Item no.: 370992
shipping weight: 3.00 kg
Manufacturer: TAMIYA

Product Description

A real workhorse! - The original "Mercedes-Benz Arocs 3363 6X4 M-Cab Classic Space" was designed for the toughest use on construction sites. Tamiya now presents this beautiful vehicle as a fully functional RC truck in 1:14 scale. The distinctive design of the new Arocs is as extraordinary as the truck as a whole. For example, a radiator grille in the so-called digger's tooth look has been installed in the look specially developed for construction vehicles, which is intended to convey the message: "Bite through and grab on". In keeping with the robust appearance, special protective grilles for the lighting system are fitted to the bumper. Impressive combinations can be put together with the 538 mm long and around 3 kg heavy kit model. Under the forward tilting driver's cab you will find the proven and robust TAMIYA truck technology. A powerful electric motor delivers its power to the two rear axles via a shifttable 3-speed gearbox. A detailed aluminium ladder frame gives the model the necessary stability and flexibility. Thanks to its high dead weight and a fifth wheel plate, the Mercedes-Benz Arocs 3363 can be coupled with numerous TAMIYA and CARSON trailers. With the optionally available multi-function unit, almost all sound and light functions of the prototype can be deceptively simulated. Required accessories - min. 4-channel remote control, e.g. CARSON Reflex Stick N° 500501006- drive battery 7.2 V, e.g. CARSON NiMH 7.2 V/3.000 mAh N° 500608022- Steering servo- TAMIYA 300056523 MFC-03 multifunction unit (euro. Sound) or sep. electronic speed controller

WARNINGS Before you start assembling the model, you should have read and understood all instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. **Caution!** Not suitable for children under 14 years.
