from **48,89 EUR**

Item no.: 369194
shipping weight: 2.00 kg
Manufacturer: Carson

Product Description

It's magic - one push of a button is all it takes to turn the extremely flat racer into a fully four-wheel drive off-road vehicle. With the "My First Magic Machine" from CARSON, almost nothing is impossible. In Race mode, the RC racer can be chased over the asphalt, the vehicle takes obstacles with a backflip, i.e. rolls over backwards and continues on its back. The top and bottom have a different design, so you can control a different-looking vehicle with your 2.4 GHz remote control in game controller look in no time at all. If the terrain gets too rough, turn the vehicle back to the first position with a backflip - and transform your Magic Machine into an off-road capable off-roader with considerable ground clearance by pressing the button on the transmitter. The large rubber tyres with extremely grippy tread give the Magic Machine enough grip on any surface. A special design steers the front and rear units of your Machine separately, so that the racer is steered on both axles at the same time. The Magic Machine is rounded off by the 100% complete scope of delivery consisting of a drive battery, charger, transmitter batteries and instructions. Have fun with your Magic Machine from CARSON. Buy - Charge - Drive!

Safety note Not suitable for children under 8 years of age. The packaging must be kept as it contains important information. The illustrations may differ from the product in the packaging. CARSON reserves the right to make improvements and changes at any time.

Technical details- Steering over both axles- Different designs on the top and bottom- Rolls over backwards at obstacles in race mode and continues on its back- Large and grippy rubber tyres- Transformation from racer to off-roader
Technical data- Age recommendation: 8 years and over- Scale: 1:10- Length: 335/270 mm- Width: 180 mm- Height: 90/120 mm- Ground clearance: 10/57 mm- Wheelbase: 245/180 mm- Weight: 600 g- Driving time: 25 min
Contents- Ready-to-run model- Remote control system- Driving battery 4.8 V 600 mAh
NiMh- USB charger- Transmitter batteries- Instructions
