from **91,31 EUR**

Item no.: 369615
shipping weight: 1.00 kg
Manufacturer: Carson

Product Description

Hippie feeling for the H0 layout! In the 1960s and 1970s, the hippies made their way from Europe to South Asia. Their preferred means of transport: brightly painted VW T1 buses. The CARSON T1 Bus Flower Power in 1:87 scale impresses with a lovingly designed paint job and a surfboard on the roof. Like the other models in the 1:87 series, the remote-controlled Mini-T1 can be used perfectly on the H0 railway layout or desk thanks to its very small turning circle. It has a trouble-free 2.4 GHz remote control system that enables finely tuned control (digital proportional) of throttle and steering with steering trim. The built-in Li-Ion drive battery guarantees a driving time of up to 70 minutes with only 30 minutes charging time and is charged directly at the transmitter via the power plug. This means that the small transporter in "flower power" design is always ready to drive, even when on the road. The functional front and rear lights round off the equipment of the RC transporter. The vehicle and transmitter are stored in a display case which is included. 4 AAA transmitter batteries complete the scope of delivery to a 100% complete set. Buy - Charge - Drive!

- 1. with LED lighting front / rear
- 2. quick charge via transmitter (30 min.)
- 3. trim for steering
- 4. very small turning circle
- 5. detailed painting and printing
- 6. fully proportional

ATTENTION! Please keep these notes for possible correspondence. Colours and technical specifications are subject to change without notice. Not suitable for children under three years of age. There is a choking hazard due to small parts which may be swallowed! Use under direct adult supervision. Adult assistance is required to remove the transport locks. Attention: not suitable for children under 36 months!

- Contents: Ready-to-run model, 2.4 GHz remote control with charging connection, driving battery 3.7 V-75 mAh Li-Ion, storage case, 4x AAA transmitter batteries, instructions
- Scale: 1:87
- Technical data: Driving time 70 min
- Age recommendation: from 8 years
