Product Description

TAMIYA presents the Porsche 911 GT-3 (992), a true modern classic on the TT-02 chassis. The 7th generation of the Porsche 911 was faithfully recreated in the GT-3 version. The 58712 TAMIYA 1/10th scale model is based on the tried and tested TT-02 chassis. The wheelbase, ground clearance, track and gear ratio can be adjusted in many ways and with the countless optional tuning parts the chassis can be quickly tuned into a racer. The 4WD drive with central shaft, double wishbones and spring struts on all four wheels ensure a prototypical driving image and best traction. The underside of the chassis is extra smooth and the battery compartment accommodates all common battery types. The visual highlight are the wheel hubs, which have attached dummy brake discs. The enclosed body is unpainted and can be painted with the TAMIYA polycarbonate colours.

Required accessories Remote control with receiver, steering servo, 7.2V NiMH battery pack, charger, paint for polycarbonate body (TAMIYA PS-)

ATTENTION! Caution! Not suitable for children under 36 months. Before starting to assemble, make sure you have read and understood all instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads.
