from 139,67 EUR

Item no.: 369237
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

The TAMIYA Lancia Delta HF Integrale on the TT-02 chassis is an easy-to-set-up RC model with all-wheel drive. The 4WD drive makes the approximately 41 cm long rally legend, also as a miniature, a fun car. The 1:10 scale kit model is based on the TT-02 chassis. The wheelbase, ground clearance, track and gear ratio can be adjusted in many ways and with the countless optional tuning parts, the chassis can be quickly tuned into a racer or converted for off-road use.

The 4WD drive with central shaft, double wishbones and spring struts on all four wheels ensure a prototypical driving image and best traction. The underside of the chassis is extra smooth and the battery compartment accommodates all common battery types. The visual highlight are the wheel hubs, which have attached dummy brake discs. The robust polycarbonate body perfectly reproduces the dynamic shape of the Lancia Delta HF Integrale and, together with the all-wheel drive, provides racing action.

Required accessories:

- Batteries and charger
- PS paint
- RC system with servo

PS paint (TS for ABS/PE bodies), battery pack & charger and RC system sold separately. Numerous optional tuning parts available.

Caution. Not suitable for children under 36 months.
