500907060 - Model Kit, 1:14 Goldhofer BAU STN-L3 Semi-Low Loader

from **544,22 EUR**

Item no.: 370911
shipping weight: 0.20 kg
Manufacturer: Carson

Product Description

The Goldhofer BAU STN-L3 trailer with the "Made in Germany" seal of quality corresponds to its prototype down to the last detail and demonstrates the high standards that CARSON-MODEL SPORT has for its products. Technically, the Goldhofer comes up with some special features: For example, an optional lighting set ensures the prototypical function of the 7-chamber rear lights. The split ramp can be folded down by hand for driving on. The trailer is equipped with three axles with dual tyres. The running gear is suspended on air suspension dummies. The frame is made of 1 mm sheet steel, laser cut, CNC bent and welded. This means that even heavier models can be transported to the next construction site. All supports are mechanically adjustable. Thanks to the split ramp, which can be folded in various stages, a wide range of models can "drive" on the low-loader. A plateau offers additional loading space. Real wood inlays, like the original, are also on board the kit. The great advantage of the Goldhofer lies in its versatility: the approximately one metre long kit model fits all tractors from TAMIYA. These include, for example, legendary US trucks such as the King Hauler and Globe Liner, as well as the MAN TGX 26.540 or other Euro trucks from Scania, Mercedes, MAN and Volvo.

The following components are required for the operation of the E-props:

- 1x 500907218 E-props (2), for front only
- 2x 500907199 gear motor for supports
- 1x 500608107 Battery Li-PO 7,4V/1300mAh
- 1x 500907070 switch for E-props
- 1x 500907071 7-chamber lighting kit

Optionally this can also be controlled via the remote control, for this you need another receiver (for channel 5 & 6), a controller 500906137 Micro and in addition a T-Plug adapter 500906099.

Notsuitable for children under 36 months.

Details

- Scale: 1:14
- Age recommendation: from 14 years
- Contents: model kit, welded steel frame, ramps 3/4x1/2 foldable, 3 axles, double tyres, ball bearings, decoration, instructions

Technical details

- 7-chamber tail lights
- Folding and split loading ramps 3/4 - 1/2
- Frame made of sheet steel
- Plateau with platform gate
- Wooden inserts

Technical data

- Scale: 1:14
- Length: approx. 1000 mm
- width: approx. 200 mm
- Height: 270 mm
