## 500907400 - Model kit, 1:14 Goldhofer TU4 low loader trailer 4A

from **643,25 EUR**

Item no.: 370913  
shipping weight: 0.20 kg  
Manufacturer: Carson

### Product Description

Goldhofer TU4 with the "Made in Germany" seal of quality corresponds to its prototype down to the last detail and demonstrates the high standards that CARSON-MODEL SPORT has for its products. Technically, the model of the Goldhofer TU4 semi-trailer comes up with many special features:

- The main frame/chassis and the bogie are made of 1mm thick steel (laser cut/CNC bent), these are simply plugged together after cutting out and assembled with a few screws
- For easier manoeuvring the bogie is equipped with a double ball bearing and sliding disks
- The two pairs of axles are pendulum suspended on leaf springs and also compensate for the rough road through many a building site
- Each axle has dual tyres with good grip, the plastic rims have double ball bearings
- Depending on the load, the one-piece ramps (steel) with wooden decking can be folded down manually and adjusted in width. If the vehicle should still be wider, the included extensions can be folded out and widened with optionally available wooden planks (art. no.: 500907449). A suitable storage compartment for the wooden planks is included in this set and is simply mounted at the intended location underneath the loading area. This way, heavier models can also be transported to the next place of use

Not suitable for children under 36 months.

Technical details

- Scale 1:14
- Kit (sheet steel laser cut)
- One-piece drive-on ramps (manually foldable)
- Loading area with continuous wooden floor covering
- Bogie with double ball bearings
