300058700 - RC Car, 1:10 RC Land Rover Defender 90 CC-02

from **247,53 EUR**

Item no.: 369240
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

Tamiya presents the CC-02 chassis (Cross Country) now in the version with a Land Rover Defender 90 (1990) body.

The CC-02 chassis was modelled on real off-road vehicles and has a frame chassis, cone differentials front and rear and a 4-link suspension. The rigid axle front and rear makes the model particularly off-road capable and the 4 CVA oil-pressure shock absorbers cushion every bump perfectly. A powerful 540 engine mounted behind the front axle provides the drive. This ensures good weight distribution when going off-road. Encapsulated in the engine is the gearbox, which transmits power to the front and rear axles via movable cardan shafts.

The body has the unmistakable design of the Land Rover Defender 90 and is made of polycarbonate. Additionally Tamiya donated a separate front grill, side mirrors and roll cage. The lamp inserts can be equipped with 5mm LEDs - the light unit is included in the kit.

ATTENTION! Caution! Not suitable for children under 36 months. Before you start assembling, make sure you have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads.

technical details

- Age recommendation: from 14 years
- 1/10 scale kit model
- length: 429mm, width: 200mm, height: 215mm, wheelbase: 242mm (like CC-01S)
- Prototypical polycarbonate body of the Land Rover Defender 90 with front grill, side mirrors and wheel arches and new body mounting points
- Lamp inserts can be equipped with 2x 5mm LED's in the front and 6x 5mm LED'S for the rear - light unit included!
- The chassis is based on real off-road vehicles and has a frame for extra stability
- For 4WD drive, the engine sits behind the front axle with a separate gearbox. The engine's power is transmitted via central drive shafts to the differentials on the front and rear axles
- 20 different reduction ratios can be set (11.09:1 to 29.28:1, different pinions sold separately)
- 4-link suspension with CVA oil-pressure shock absorbers
- black ABS rims with off-road tyres
- electronic speed controller included
- numerous tuning parts available

Contents

- Kit model
- detailed illustrated assembly instructions
- Electronic speed controller
- 540cc electric motor
- Polycarbonate body
