## 300058699 - RC Car,1:10 RC Audi V8 1992 Touring Car TT-02

from **136,61 EUR**

Item no.: 369214  
shipping weight: 2.00 kg  
Manufacturer: TAMIYA

### Product Description

The Audi V8 raced in Germany in 1992. It was powered by a 3.6l V8 engine and thanks to the all-wheel drive it was superior to the opponents despite additional weights. The TT-02 chassis serves as the basis for the 58699 TAMIYA model in 1:10 scale. The wheelbase, ground clearance, track and gear ratio can be adjusted in many ways and with the countless optional tuning parts the chassis can be quickly tuned into a racer. The 4WD drive with central shaft, double wishbones and spring struts on all four wheels ensure a prototypical driving image and best traction. The underside of the chassis is extra smooth and the battery compartment accommodates all common battery types. The visual highlight are the wheel drivers, which have attached dummy brake discs.

Required accessories Remote control with receiver, steering servo, 7.2V NiMH battery pack, charger, paint for polycarbonate body (TAMIYA PS-)

Attention! Before you start assembling, make sure you have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads.
