RC Car, 1:10 RC M-07 Concept Chass.Kit WB225/239

from **169,70 EUR**

Item no.: 369241
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

The M-07 Concept Chassis is THE revolution in the field of medium-size chassis! Design elements from 1:10 touring car chassis are reflected here, but the M-07 Concept Chassis no longer has many similarities with the previous models. During development, the focus was on ease of maintenance and performance. The variable wheelbase (M: 225 mm, L: 239 mm) of this chassis can be combined with different car bodies. The one-piece monocoque chassis is characterised by its torsional stiffness and easy maintenance. A variety of optionally available tuning parts and motorisation options contribute to the perfect racing set-up.

Required accessories Remote control with receiver, steering servo, 7.2V battery pack, charger, body, electronic speed controller.

WARNINGS Before you start assembling, make sure you have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads.

Caution: Not suitable for children under 14 years of age.
