RC Car, 1:10 RC Lancia Delta HF Integrale XV-01

from **256,29 EUR**

Item no.: 369239
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

The TAMIYA Lancia Delta HF Integrale on the XV-01 belt chassis is an off-road RC model with all-wheel drive. Front engine and an encapsulated 4WD belt drive make the approximately 41 cm long rally legend, also as a miniature, a fun car. Double wishbones and oil-pressure shock absorbers ensure excellent on- and off-road handling. Ball bearings reduce friction and increase top speed and driving time. With the optionally available tuning parts, the chassis can be quickly tuned into a racer. The robust polycarbonate body perfectly reproduces the dynamic shape of the Lancia Delta HF Integrale and, together with the all-wheel drive, ensures racing action.

Please note that batteries and charger, RC system with servo and speed controller are required separately.

Warnings Before you start assembling, you should have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads.

Caution: Not suitable for children under 14 years of age.

Technical details- age recommendation: 14 years and over- 4WD chassis with enclosed belt drive- front motor- robust polycarbonate body 1 mm thick- decal sheet and painting aid- double wishbones with oil pressure shock absorbers- block tread tyres- separately moulded side mirror parts- electric motor type 540- sealed ball bearings- adjustable front toe/camber- adjustable rear camber- electronic box for receiver/controller- battery can be inserted from below

Technical data- Scale: 1:10- Length: 407 mm- Width: 186 mm- Height: 155 mm- Wheelbase: 257 mm- Wheels: 27/69 mm

Contents- 4WD kit model- XV-01 chassis- encapsulated timing belt drive- 540cc electric motor- polycarbonate body with add-on parts- oil pressure damper- cone diff. vo/hi- tub chassis- rally block tyres with inserts- instructions
