Product Description

The CARSON Virus 4.0 is an innovative 4WD buggy with a race chassis optimised for off-road tracks. The main switch, receiver and batteries are housed in an easy-to-open splash/dust-proof box, so you can have fun even in wet weather. To protect the steering and throttle/brake servo from moisture, the housings have been sealed. The 3 mm aluminium chassis is extra narrow and has one chassis strut each front and rear. Massive wishbones and sideguards ensure long-lasting driving pleasure. The 3.5 cc Force engine provides the all-wheel drive with massive power and accelerates the 4.0 to over 65 km/h. Big Bore aluminium oil-pressure shock absorbers and numerous setup options ensure perfect grip and let the CARSON Virus 4.0 fly over all tracks.
