## 300058675 - RC Car,1:10 RC MB G-Class G500 CC-02

from **257,43 EUR**

Item no.: 369246  
shipping weight: 2.00 kg  
Manufacturer: TAMIYA

### Product Description

TAMIYA now presents the CC-02 chassis (Cross Country) in the version with a Mercedes Benz G500 body.

The CC-02 chassis was modelled on real off-road vehicles and has a frame chassis, cone differentials front and rear and a 4-link suspension. The rigid axle front and rear makes the model particularly off-road capable and the 4 CVA oil-pressure shock absorbers cushion every bump perfectly.

The drive is provided by a powerful 540 engine, which is installed behind the front axle. This ensures good weight distribution when going off-road. Encapsulated to the engine is the gearbox, which transmits the power to the front and rear axles via movable cardan shafts.

The body has the unmistakable design of the Mercedes Benz G500 and is made of polycarbonate. Additionally TAMIYA donated a separate front grill, side mirrors and wheel arches. Highlight is the included TAMIYA TLU-01 light set for a fancy LED illumination of the model.

Contents: 4WD kit model, CC-02 chassis, instructions, elect. Drive controller, polycarbonate body with add-on parts, 540 electric motor, oil pressure dampers, rigid axle vo/hi manually lockable, trailing arm suspension, ladder frame chassis, LED light unit, instructions.

Warnings:

- Before you start assembling, make sure you have read and understood all instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions
- Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury
- If difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or specialist dealer
- Use tools only for their intended purpose. There is a risk of injury if used incorrectly
- If you use paints and/or glues (not included in the kit), observe and follow the instructions enclosed with them
- Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads

Technical details

- Kit model in scale 1/10
- length: 455 mm, width: 196 mm, height: 207 mm, wheelbase: 267mm
- TLU-01 LED light unit and LED's included!
- Prototypical polycarbonate body of the Mercedes Benz G500 with separate front grill, side mirrors and wheel arches
- The chassis is modelled on real off-road vehicles and has a frame for extra stability
- For 4WD drive, the engine sits behind the front axle with a separate gearbox. The power from the engine is transmitted via central drive shafts to the differentials on the front and rear axles
- 20 different reduction ratios can be set (11.09:1 to 29.28:1, different pinions sold separately)
- 4-link suspension with CVA oil-pressure shock absorbers
- Electronic speed controller included
