from **127,83 EUR**

Item no.: 369216
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

The Audi V8 raced in the 1991 German Touring Car Championship (DTM). This V8 was driven at that time by Frank Biela, who took a total of 4 season victories and thus secured the overall title at the end of the season. The 58682 TAMIYA 1:10 scale model is based on the TT-02 chassis. The wheelbase, ground clearance, track and gear ratio can be adjusted in many ways and with the countless optional tuning parts the chassis can be quickly tuned into a racer. The 4WD drive with central shaft, double wishbones and spring struts on all four wheels ensure a prototypical driving image and best traction. The underside of the chassis is extra smooth and the battery compartment accommodates all common battery types. The visual highlight are the wheel hubs, which have attached dummy brake discs. - Contents: 4WD kit model, TT-02 chassis, elect. 540 torque-tuned motor, polycarbonate body with add-on parts, cardan drive, spring struts, independent suspension, slick tyres, tub frame chassis, instructions- Required accessories: - Remote control with receiver, steering servo, 7.2V NiMH battery pack, charger, paint for polycarbonate body (TAMIYA PS-)WARNING: Before you start assembling, you should have read and understood all instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or specialist dealer. Use tools only for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions enclosed with it. Keep kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 36 months.

- Contents: 4WD kit model, TT-02 chassis, elect. speed controller, 540 torque-tuned engine, polycarbonate body with add-on parts, cardan drive, suspension struts, independent suspension, slick tyres, tub frame chassis, instructions- 1/10 scale kit model- beginner-friendly TT-02 chassis - extremely robust- enclosed 4WD four-wheel drive- prototypical, polycarbonate body- decal sheet car No.45 by 1991 Frank Biela- side mirrors- 2-piece rims with slick tyres- powerful 540 "Torque-Tuned" electric motor- independent front and rear suspension- electronic speed controller- many tuning parts optionally available- recommended age: 14 years and over
