from **52,61 EUR** Item no.: 370776

shipping weight: 1.00 kg Manufacturer: ITALERI

## Product Description

Actros is the commercial name of the heavy-duty trucks from Mercedes-Benz. The Actros product line was introduced in 1995 and quickly achieved great commercial success, especially in long-distance freight transport. After several innovations, it has reached its highest expression as the New Actros, which was launched in 2012 and featured an extremely modern and up-to-date design as well as the new Euro 5 and Euro 6 class engines. The vehicle configuration was realised to optimise operational efficiency, ensuring maximum performance and the lowest possible cost of ownership. Among the numerous versions offered, the "Gigaspace" cab configurations are particularly interesting, offering maximum on-board comfort and comfortably accommodating two drivers. Consequently, the Actros Gigaspace are the ideal solution for international long-distance freight transport. Detailed plastic model kit of the Mercedes Benz Actros MP4 Gigaspace model in scale 1:24. Caution! Not suitable for children under 36 months.
