300056366 - RC Car, 1:14 RC MB Arocs 4151 Tipper 8x4

from **726,37 EUR**

Item no.: 370993
shipping weight: 3.00 kg
Manufacturer: TAMIYA

Product Description

The TAMIYA truck for tough construction site use! The Mercedes Benz Arocs 4151 8x4 is a real heavyweight on the construction site. TAMIYA has modified the proven chassis for this truck: The truck has 4 axles as in the original. The two rear axles are driven by a powerful 540 electric motor. The two front axles are steered by a servo (available separately). The steering angle of the two axles is different, so that a true-to-the-original driving behaviour is achieved. The frame has a subframe to accommodate the newly designed tipping trough. The tipping body has been reinforced with a metal subframe and can be controlled via the optional TAMIYA ACU-01 unit (56545). The distinctive design of the new Arocs is as unusual as the truck as a whole. For example, a radiator grille in the so-called digger's tooth look has been installed in the look specially developed for construction vehicles, which is intended to convey the message: "Bite through and grab hold". In keeping with the robust appearance, special protective grilles for the lighting system are fitted to the bumper. The 667 mm long and around 4 kg heavy kit model can be used to put together impressive combinations. Under the forward tilting cab you will find the proven and robust TAMIYA truck technology. A new Mighty-Tuned 35T electric motor delivers its power to the two rear axles via a shiftable 3-speed gearbox. A detailed aluminium ladder frame gives the model the necessary stability and flexibility. A towing hitch (e.g. Carson 500907182) can be attached to the rear part of the frame to pull trailers. With the optionally available multi-function unit almost all sound and light functions of the prototype can be deceptively simulated. Required accessories: - Min. 4 channel remote control - recommended Carson Reflex Stick 500501006 (6-channel), 500501003 (14-channel) or 500501004 (14-channel LCD display) - 7.2V NiMH battery pack, charger - TAMIYA TS paint for painting - steering servo + servo for gearbox - speed controller or TAMIYA multifunction unit MFC-03 300056523 for the driving, light and sound functions - TAMIYA ACU-01 spindle drive unit (300056545) for driving the trough. The ACU-01 plugs into the multifunction unit. WARNINGS: The instructions should be read and understood in full with an adult. Keep away from small children. Do not allow children to put any parts or packaging material in their mouths. The model may have some sharp corners. Be aware of this when handling. Read the instructions included with the RC unit and keep them for future reference. If difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or specialist dealer. Use tools only for their intended purpose. There is a risk of injury if used incorrectly. If you use paints and/or glues (not included in the kit), observe and follow the instructions enclosed with them. Keep kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. - 1:14 scale kit model - Dimensions: Length 667 mm, width 196 mm, height 168 mm - TAMIYA 4-axle chassis with reinforced frame and drive of the two rear axles - Both double axles at the front are articulated via a steering servo. The axles steer at slightly different angles for prototypical driving behaviour. - prototypical ABS body reproduction of the Arocs 4151, including handrails, steps, side mirrors and much more. - New tipping body with a metal subframe. The tipping body can be controlled via the separately available ACU-1 (300056545) (TAMIYA MFC-03 unit 56523 required). - Includes TR mighty-tuned engine for perfect power delivery to the two driven rear axles. - New rear tyres, bumper and mudguards. - 3-speed manual gearbox can be controlled via optional 4-channel remote control. - Leaf springs on the axles and rear shock absorbers with coil springs. - The headlights on the roof lamp bar can be fitted with LEDs (sold separately). Caution! Not suitable for children under 36 months.

- Scope of delivery: Mercedes-Benz Arocs 4151 Classic Space Tipper 8x4 model kit, ABS plastic body, aluminium ladder frame, 2 driven rear axles, 3-speed manual gearbox, chrome-plated rims, instructions, 540 electric motor - Recommended accessories: MFC-03 multifunction unit (300056523) for the driving, light and sound functions; ACU-01 spindle drive unit (300056545) for the tipping function - Recommended age: 14 years and over
