4,58 EUR

Item no.: 365643
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color Stop is an innovative, rubbery compound specially formulated to create precise stripes or shapes in your painting projects. The 30ml bottle contains an easy-to-apply, solidifiable compound that allows you to paint or spray over colours and then easily remove to leave clean, sharp edges.

The advantages of Color Stop at a glance:

- Precise masking: The rubbery compound allows stripes or shapes to be precisely left out without the paint running
- Easy handling: Color Stop is easy to apply with a brush and dries quickly
- Residue-free removal: After the paint has dried, the solidified mass can be easily removed without damaging the underlying layer of paint

How to use Color Stop:

- Shake the bottle thoroughly before use
- Apply the compound with a brush in the desired shape or width to the surface to be protected
- Allow Color Stop to dry completely
- Paint or spray the desired colour over the surface and let it dry as well
- Carefully peel off the solidified compound to reveal clean and precise stripes or shapes
- If necessary, repeat the procedure to create multi-layered or complex designs

Revell Color Stop is an essential tool for modellers, artists and DIY enthusiasts who value precise and clean results in their painting projects. The 30ml bottle offers enough content for numerous applications and allows you to take your creativity to a new level. Order your Color Stop now and experience how easy it is to create impressive stripes and shapes!

Attention! Only for children over 8 years. Use under adult supervision. Preservatives, Agents de préservation: Bronopol
