

Item no.: 365740

Synthetic resin-based model paint, dark grey silk matt, RAL7012, 14ml

from **1,81 EUR**

Item no.: 365740
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix.

This way, the paint can be applied not only with a brush but also with a spray gun. As a cleaning agent, use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used

- as paint for standard camouflage paint on Luftwaffe aircraft (Bundeswehr) such as MDD F-4E Phantom II, together with 361 olive green and 90 silver
- as topside paint of Royal Air Force and Royal Navy aircraft for predominantly maritime missions, often in combination with 371 light grey
- as cockpit interior paint

Caution! Not suitable for children under 36 months.
