

Item no.: 365658

Enamel colour yellow, matt, 14ml, RAL 1017 - modelling colour

from **1,80 EUR**

Item no.: 365658
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix. This means that the paint can be applied not only with a brush but also with a spray gun.

Use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

Caution. Not suitable for children under 36 months.

This colour shade is used:

- Especially as marking and identification paint on military aircraft
- as surface paint on training aircraft
- as underside paint (together with black) on target display aircraft of the British Air Force
- for fuselage bands on Luftwaffe aircraft in World War II
- for ribbons for the marking of French aircraft of the Vichy government
