

Item no.: 365655

Enamel colour black, matt, 14ml, RAL 9011 - model paint

from **1,80 EUR**

Item no.: 365655
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists. All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix. This means that the paint can be applied not only with a brush but also with a spray gun.

Use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

Caution. Not suitable for children under 36 months.

This colour is used

- as a random paint on many military and civil aircraft
- as marking and identification paint on military and civil aircraft
- as topside paint for Luftwaffe night fighters in World War II
- for undersides on Luftwaffe aircraft during night operations instead of light blue RLM 65
