

Item no.: 365704 Enamel colour earth colour, matt 14ml, RAL 7006 - Model making paint

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

For example, the paint can be applied not only with a brush but also with a spray gun. As a cleaning agent, use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

Caution. Not suitable for children under 36 months.

All colours - except signal colour - are intermixable and can be diluted with Revell Color Mix.
