

Item no.: 365657

Synthetic resin-based modelling paint, yellow glossy, RAL 1018, 14 ml

from **1,80 EUR**

Item no.: 365657
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix. This means that the paint can be applied not only with a brush but also with a spray gun.

Use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used

- for markings for military aircraft (identification letters, maintenance instructions in the 50s, together with an exterior coat of silver)
- as exterior paint for USAF and US Navy training aircraft until 1945

Caution! Not suitable for children under 36 months.
