from **1,74 EUR**

Item no.: 365663  
shipping weight: 0.10 kg  
Manufacturer: Revell

### Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists. All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix. This way, the paint can be applied not only with a brush but also with a spray gun. As a cleaning agent, use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This is the colour used:

- Especially on US fighter planes, bombers and sometimes on transports
- as exterior paint for remote-controlled aircraft (drones) of the USAF and US Navy and aircraft of the German fire brigade (e.g. Do-27)

Caution. Not suitable for children under 36 months.

- Fire red, glossy
- 14 ml
- RAL 3000
