

Item no.: 365691

Revell enamel colour granite grey, matt, 14ml, RAL 7026, synthetic resin-based modeling paint

from **1,87 EUR**

Item no.: 365691
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix.

This way, the paint can be applied not only with a brush but also with a spray gun. As a cleaning agent, use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used

- as surface camouflage paint of the new US Navy standard camouflage scheme
- as interior paint for aircraft of the German Luftwaffe 1939-1945
- Sometimes used in combination with other greys and greens for surface painting (e.g. Fairchild A-10 Thunderbolt II)
- Granite grey can also be used instead of anthracite when dirty

Caution. Not suitable for children under 36 months.

- Granite grey, matt
- 14 ml
- RAL 7026
