

Item no.: 365651

Revell enamel colour white, glossy, 14ml, RAL 9010, synthetic resin-based modelling paint

from **1,81 EUR**

Item no.: 365651
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix. This means that the paint can be applied not only with a brush but also with a spray gun.

Use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used

- for civil aircraft, airliners - painting of fuselage and wings (partially)
- as part of the camouflage paint of the US Navy
- for landing gear bays and landing gear legs on US Navy aircraft
- as exterior paint for jet trainers of the USAF

Caution. Not suitable for children under 36 months.

- White, glossy
- 14 ml
- RAL 9010
