Revell enamel colour silver, metallic, 14ml, synthetic resin-based model paint

from **1,81 EUR**

Item no.: 365707
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix.

This way, the paint can be applied not only with a brush but also with a spray gun. As a cleaning agent, use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used:

- Together with 91 and 99, different colour tones can be represented as they appear on aircraft that have no paint but have been left in natural metal
- Silver can be used on fabric-covered aircraft, which were often painted in this colour
- as a colour for the overall paint scheme on aircraft of the 50s and 60s that were painted silver (e.g. F-86 Sabre, F-100 Super Sabre, F-101 Voodoo, Lockheed C-130 Hercules, C-141 Starlifter etc.)

Caution. Not suitable for children under 36 months.

- Silver, metallic
- 14ml
