

Item no.: 365656

Revell Enamel Colour Anthracite, matt, 14ml, RAL 7021, synthetic resin-based modeling paint

from **1,81 EUR**

Item no.: 365656
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix. This means that the paint can be applied not only with a brush but also with a spray gun.

Use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used

- for painting tyres on landing gears
- as dirt on engine exhausts, also for all other dirt anthracite is better suited than pure black
- as paint for homing buttons on rockets and partly also as interior colour for cockpits

Caution. Not suitable for children under 36 months.

- Anthracite, matt
- 14ml
- RAL 7021
