from **1,80 EUR**

Item no.: 365733  
shipping weight: 0.10 kg  
Manufacturer: Revell

## Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix.

This way, the paint can be applied not only with a brush but also with a spray gun. As a cleaning agent, use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used

- for camouflage painting of Bundeswehr air force aircraft
- as topside paint for helicopters
- as topside camouflage paint on Luftwaffe aircraft during World War II (RLM 82)
- as anti-glare surfaces of US military aircraft especially in front of the cockpit glazing
- as surface paint of Royal Navy helicopters (Wessex, Sea King) during the Falklands conflict in 1982
- as a new topside camouflage paint for Tornado of the BW Navy (together with Matt 9 Anthracite)
- as surface paint on aircraft of the USAAC - US Army Air Corps, the predecessor institution of the USAF - during World War II (e.g. North American P-51 Mustang, Republic P-47 Thunderbolt etc.)

Caution! Not suitable for children under 8 years.
