

Item no.: 365695

Synthetic resin-based modeling paint, dusty grey matt, RAL 7012, 14 ml

from **1,87 EUR**

Item no.: 365695
shipping weight: 0.10 kg
Manufacturer: Revell

Product Description

Revell Color is a synthetic resin enamel paint that does not attack the plastic surface of plastic models. However, many other materials can also be painted from the 14 ml paint can, which is popular with many hobbyists.

All colours - except signal colour - can be mixed with each other and thinned with Revell Color Mix.

This way, the paint can be applied not only with a brush but also with a spray gun. As a cleaning agent, use Revell Painta Clean for the brushes and Revell Airbrush Clean for the spray gun.

This colour shade is used

- as paint for standard camouflage paint on Luftwaffe aircraft (Bundeswehr) such as MDD F-4E Phantom II, together with 361 olive green and 90 silver
- for topsides of Royal Air Force and Royal Navy aircraft for predominantly maritime missions, often in combination with 371 light grey
- Often also used for cockpit interior painting
- as surface camouflage colour of the German Luftwaffe for fighter planes from 1943-1945, in combination with 374 grey and 78 armour grey

Caution! Not suitable for children under 8 years.
