370410064 - 3.7V 150mAh Li-Po battery for helicopter, RC, from 10 years of age

from **4,76 EUR**

Item no.: 363965
shipping weight: 0.10 kg
Manufacturer: Carrera

Product Description

Off to new heights! If your helicopter is no longer performing as well as it did at the start, it's time to install a replacement battery. This lithium-polymer battery has 3.7 V. You should know and observe this voltage when choosing the right charger. The unit milliampere hours (mAh) indicates the amount of charge that can flow through the device in one hour. This is 150 mA for this battery. When disposing of your old Li-polymer battery, look out for the yellow boxes specially set up for this purpose in electrical or DIY stores. Never dispose of your old battery in normal household waste. The disposal centres of the local waste disposal companies also offer professional disposal. Your Green Chopper II (501027), Green Chopper (501003), Black Stinger (501010), Orange Sply (501005), Red Buzzer (500001), Blue Papy (500002) and Purple Falcon (500003) helicopters will be delighted with the new battery.

Details- Age recommendation: from 14 years Technical data- Voltage: 3.7 Volt- Capacity: 150 mAh- Technology: Lithium-Polymer compatible with- Green Chopper II (501027)- Green Chopper (501003)- Black Stinger (501010)- Orange Sply (501005)- Red Buzzer (500001)- Blue Papy (500002)- Purple Falcon (500003) Content- 1 piece
