Product Description

An exciting game in the new AMIGO dice game series! Once a year, the pirates meet on Skull Island and tell each other the latest stories. In "Pirate Capture", the pirate's task is to grab as many treasures as possible. Card after card is turned over and fulfilled in the best possible way by skilful dice luck. In this way, you also get diamonds, gold and important victory points at the end. But beware of the skulls - because they end the sea voyage immediately. The first player to reach 6,000 points wins. A simple action-packed game with a unique combination of dice and card game with addictive factor. How to play "Pirate Capers": * The pirate cards are shuffled and placed in the centre of the table as a draw pile. * Each player receives an overview card with all possible dice combinations and how many points they are worth. * The player whose turn it is turns over the top pirate card, which gives him bonus points but also minus points. * The player may roll the dice several times, but each roll must consist of at least two dice. Skulls are no longer rolled. * Points are awarded for identical symbols. Diamonds and gold coins score extra points. * A player must voluntarily end his turn before rolling a third skull, otherwise he receives no points. * Points for individual dice and combinations are added up and noted. * The first player to have 6000 points or more wins.
