510002797 - Model Kit,1:48 A-7E Corsair II

from **30,15 EUR**

Item no.: 369886
shipping weight: 0.80 kg
Manufacturer: ITALERI

Product Description

The Vought A-7 Corsair II was designed and built in the early 1960s to meet US Navy requirements for a new carrier-based attack aircraft to replace the piston-powered A-1 Skyraider and A-4 Skyhawk jets. Developed directly from the fuselage of the Vought F-8 Crusader carrier-based fighter, the A-7 entered service in 1965. It featured a large frontal air intake and arrow-shaped 35° wings with retractable tails, which served to reduce the space required on the carrier deck, and a modern head-up display that improved operational efficiency. The "Corsair II" had the capability to carry an impressive attack armament, typically consisting of free-fall bombs, guided Paveway bombs and air-to-surface missiles. The A-7E was the last version built for the US Navy with even better operational performance. The A-7E could use Harpoon anti-ship missiles and AGM-88 HARM radar countermeasures missiles.

Details- Scale: 1:48- Recommended age: 14 years and up
Technical data- Length 290 mm
Information- The high-quality kit from Italeri must be assembled independently.- The independent assembly is accompanied by step-by-step or illustrated assembly instructions. - The assembly instructions are of course included in the delivery.- Based on the assembly instructions, the precisely fitting individual parts must be assembled. - The parts can be painted according to your own ideas.- Tools, glue and paint are not included in the plastic kit. These must be purchased as an option.
