from **456,71 EUR**

Item no.: 370999
shipping weight: 3.00 kg
Manufacturer: TAMIYA

Product Description

Winner of the 2009 readers' choice of MODELL FAHRZEUG magazine. The first European three-axle tractor from TAMIYA! After the Scania R470 has so thrilled the truck modelling scene, TAMIYA is now expanding its three-axle series with the Scania R620, this extremely attractive European tractor. With the Scania R620 replica, which is over 50 cm long and weighs around 3 kg, impressive combinations can be put together in a new dimension. Under the forward tilting cab you will find the proven and robust Tamiya truck technology. A powerful electric motor delivers its power to the two rear axles via a shiftable 3-speed gearbox. A detailed aluminium ladder frame gives the model the necessary stability. Thanks to its high dead weight and a fifth wheel plate, the R620 can be coupled with numerous TAMIYA and CARSON-MODEL SPORT trailers. **Warnings** Before you start assembling, you should have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. **Caution!** Not suitable for children under 14 years of age.

Details- Scale: 1:14- Recommended age: 14 years and over **Contents**- Scania R620 Highline model kit- ABS plastic body with aero package- Aluminium ladder frame- 2 driven rear axles- 3-speed manual gearbox- Chrome-plated rims - Instructions - 540-axle electric motor - Prototypical 2-wheel drive.
