The year is 1947 and... the criminal world will never be the same again! The legendary thief Al Capone, knowing full well that his life is coming to an end, has broken into the most secure vault in the United States to hide all his stolen goods in plain sight! What choice did he make? The safest place in the world: Fort Knox vault! Walls covered with a layer of concrete and a 22-tonne door at the entrance... What else is there to say, except that the jewels of the United Kingdom were also stored here during the Second World War. Even though Al Capone made a huge fortune through fraud and robbery, the main reason for breaking into Fort Knox was the precious treasure of his childhood, which he kept all his life - the Bubu coin, a relic of all generations of the Capone bloodline. But now the time has come to become a new legend in the world of crime! Infiltrate the impregnable Fort Knox Pro and be the first to get your hands on the precious Bubu Coin. Let's go!
