After extensive research, scientists have finally discovered another habitable planet in our universe - planet X63Z. Let me introduce you: Astronaut Bubu! He was sent on a top-secret mission to explore this new discovery, collect soil samples from the planet and then bring them back to Earth. It was a long and arduous journey, but after 39 years, our brave astronaut Bubu was finally able to collect the all-important samples. It seems like humanity's salvation is within reach! But... Bubu is trapped in an infinite universe. The asteroid has crashed brutally, damaging the spaceship's fuel cells and... Bubu sends a distress call to Earth. That can only mean one thing - now you have to save Bubu and humanity. But be careful! The spaceship is equipped with the latest safety systems. Use your logical thinking and unlock the spaceship in less than 60 minutes to bring Bubu and his precious samples to safety.
