## Revell model kit ,Shelby Mustang GT 350 H

from **28,14 EUR**

Item no.: 366272  
shipping weight: 0.80 kg  
Manufacturer: Revell

### Product Description

Welcome to the world of detailed model making! The Shelby Mustang GT 350 H in 1:24 scale offers you a realistic replica of the famous sports car with its 86 parts. With a length of 191 mm and an age recommendation of 10+, this kit is ideal for fans and enthusiasts who are in the advanced modelling category (level 4) and already have experience in gluing and painting. This model is not only an eye-catcher in your collection, but also a testimony to Ford's automotive history. The Shelby Mustang GT 350 H was first presented at the 1964 World's Fair in New York and embodied the youthful energy of its time. As the forerunner of the pony car, the Mustang set new standards in the automotive world. Its high-performance road-going version, the GT 350, was equipped by Carroll Shelby with an impressive 4.7-litre V8 engine. The highlight? The special H version, where the "H" stands for the car hire company Hertz, was available in black with gold trim and offered customers the opportunity to hire real racing cars! From the finest detail of the bodywork to the authentic replica of the wheel rims, this model impresses with its accuracy. With a separate, movable bonnet, you can admire the multi-part, detailed engine. The set includes many chrome parts that give the model a special lustre. To add the finishing touches to your model, the kit includes true-to-original decals.
