from **21,65 EUR**

Item no.: 366253  
shipping weight: 0.80 kg  
Manufacturer: Revell

## Product Description

Are you enthusiastic about revolutionary technology and sporty cars? Then the BMW i8 model kit in 1:24 scale is just the thing for you! With a part count of 131 and a length of 195 mm, this kit offers a faithful reproduction of the innovative plug-in hybrid sports car.

The BMW i8 features a 3-cylinder engine with two turbochargers that produces a whopping 170 kW (231 hp) of power and 320 Nm of torque. The front axle is driven by an electric motor that delivers 96 kW (131 hp). The intelligent energy management perfectly coordinates the interaction of both engine types and enables real sports car performance with consumption and emission values of a small car.

This model kit contains a true-to-original, multi-part body, a multi-part 3-cylinder engine and a very detailed replica of the electric motor. You also have the choice of building the doors open or closed. With a detailed interior, textured front seats, authentic emergency seats, a separate movable tailgate, detailed wheel suspensions and chrome-plated parts such as rims and reflectors, this kit offers a wealth of detail. The comprehensive decals include international registration plates (D, A, NL, F, B, CH, GB, I, RUS) for an authentic look.
