Model kit, London Bus, 391 parts, from 14 years old

from **57,95 EUR**

Item no.: 366280
 shipping weight: 1.10 kg
 Manufacturer: Revell

Product Description

The AEC Routemaster was first presented to the public in 1954. Compared to previous bus types, the Routemaster with its integral design of chassis and body was considered truly innovative. In particular, the open entrance platform at the rear left, which allowed quick hop-on and hop-off, characterised the double-decker, which went into series production in 1958. At the end of the 1950s, changed regulations also allowed the operation of buses over nine metres long on only two axles. Some Routemasters were then divided in the middle and an additional area was added in the middle, recognisable by square windows. The new type of bus, the Routemaster long, or RML for short, could now seat a total of 72 passengers. The brilliant success with 15 test vehicles convinced London Transport to order another 500 RMLs, which were produced from 1965 to 1968. In the 1970s, more and more RMLs were in service in the inner-city area of London. With the constant presence of the typical red double-deckers on almost all routes, the image of the Routemaster as a typical London landmark became increasingly established. It was not until 2005, after almost 50 years of service, that the general operation of this flagship of London was discontinued.

ROUTEMASTER is a registered trademark of Transport for London.

Model Details:

- Multi-piece body
- Detailed reproduction of the surface structures
- Reproduction of the complete passenger compartment with 72 seats
- Detailed cockpit
- Multi-part Leyland and Scania engine
- Movable bonnet
- Multi-part underbody
- Rotating wheels
- Typical open entrance area
- Two separate passenger levels
- Optional removable roof segment
- Many clear parts
- Decal for two RML versions

FIGURES NOT INCLUDED IN THE KIT!

Scope of delivery:

- Plastic model kit (not assembled)
- Illustrated, multilingual building instructions
- Decals

Attention: not suitable for children under 36 months!

- Scale: 1:24
- Age recommendation: 14+
- Number of parts: 391
- Length: 381 mm
