Product Description

Model replica of the F/A-18E. The F/A-18E Super Hornet is the US Navy's most modern fighter and combat aircraft and replaces the F-14. Since 2002, it has flown successful combat missions, e.g. during Operation Enduring Freedom and in Iraq. Through the use of JDAM and "laser-guided bombs", it can attack enemy targets much more precisely; it also has an extensive arsenal of guided weapons.
