Product Description

The Eurofighter Typhoon model kit in 1:144 scale is a must for all model building fans and aviation enthusiasts. With 63 parts and a length of 111 mm as well as a wingspan of 76 mm, the kit offers a great challenge for model builders aged 10 and over.

The Eurofighter is the superior high-performance multi-role fighter of the latest generation and, with a top speed of Mach 2.0+, masters both long- and close-air combat and air-to-ground operations. It is primarily designed as a fighter aircraft for airspace protection and is equipped with a mixed armament of powerful short and medium range air-to-air missiles.

The model kit impresses with its new kit form and finely structured surfaces with recessed "sheet metal joints". It also features a detailed cockpit, detailed landing gear as well as two external tanks and eight guided missiles (4 METEOR, 4 AMRAAM, 2 IRIS-T and 2 ASRAAM). Two decal versions are also included: German Air Force and RAF.
