Product Description

What is your favourite thing to build? The most popular German assault gun StuG III or the fearsome flamethrower? The choice is yours! We provide the building blocks and instructions! The block model of the StuG III and the Flammpanzer was developed on a scale of 1:35 to match the figures from 548 elements. The model is approx. 21 cm long and the colours refer to winter activities. The model has a service hatch with block motor. You can move the model thanks to the working chain traction! The set uses high-quality, durable prints. The set includes an attractive figure of an assault gun crew member, a name plate and the bricks required to build the selected version of the vehicle! The set offers an exciting build and perfectly complements the collection of 1/35th scale WWII vehicles, further demonstrating the possibilities of high quality block modelling! Build history, brick by brick! STUG III (Sturmgeschütz III) was a German tank destroyer used in the Second World War. Based on the chassis of the PzKpfw III tank, this assault vehicle was equipped with a massive superstructure with a 75 mm gun. The main task of the STUG III was to support the infantry and engage enemy targets such as barricades and armoured vehicles. The Flammpanzer was very similar to the STUG III. However, it was adapted to carry out fire missions with a powerful flamethrower. The Flammpanzer is equipped with a special tank for liquid incendiary mixture. The mixture was injected through a pipe and created a jet of fire with a range of several dozen metres. The main task of the flame tank was to fight fortifications, destroy buildings and destroy infantry.

Details- Scale 1:35- Recommended age: 8 years and up- No. of parts: 549Dimensions- Length: 205 mm- Width: 84 mm- Height: 90 mmContents- Building kit- Minifigures: 1- sign with the name of the set,- additional blocksInformation- made in the EU by a company with over 35 years of tradition- meets the safety standards for children's products- fully compatible with clamp building blocks from other brands- clear and intuitive instructions based on drawings and symbols
