Product Description

We have designed the 1:35 scale model of the German heavy armored car Sd.Kfz 234/2 PUMA from 470 elements. The built vehicle is 20 cm long and fits the size of the figures as well as other vehicles that we publish in this scale. The vehicle impresses with its very neat design, camouflage and decals, which make it a very important item in the COBI Historical Collection. There are no stickers here, we only use permanent prints. The vehicle has movable elements such as wheels, turret and cannon. The set includes a figure representing an armored car crew member. The entire set is complemented by a sign with the vehicle name. The set is not only a must for young history buffs, but above all for adult collectors and fans of military technology. Build history, brick by brick! Sd. Kfz. The 234/2 Puma is a German wheeled armored vehicle that was used in the Second World War. It was equipped with a 50 mm cannon housed in a fully armored turret. From September 1943 to September 1944, 101 of these vehicles were produced. The car had a Tatra 103 diesel engine and reached a remarkable top speed of up to 90 kilometres per hour. Off-road, it performed almost as well as tracked vehicles.
