from **12,91 EUR**

Item no.: 363249
shipping weight: 0.10 kg
Manufacturer: Carrera

Product Description

Are you a happy owner of the Carrera RC 24Hr Tow Truck and looking for a new controller to go with it? You'll find it here. With its digital proportional 2.4 GHz radio technology, steering the vehicle is child's play. Up to 16 vehicles can be controlled in parallel without interfering with each other. In addition, thanks to the D/P technology, the car reacts to the slightest touch of the throttle and can be moved 360° in all directions. Of course, this doesn't allow the truck to fly upwards, but on the ground you have every opportunity to perform precise steering and driving manoeuvres. After all, you can only enjoy perfect driving pleasure with the right steering.

Attention: not suitable for children under 36 months!
