from **27,17 EUR**

Item no.: 369948
shipping weight: 0.80 kg
Manufacturer: ITALERI

Product Description

The stand model is a replica of the F-4E Phantom II. The F-4 Phantom II was developed by the American aircraft company McDonnell Douglas and is a tandem two-seater all-weather supersonic fighter-bomber. It entered service in the 1960s and is one of the most famous aircraft in military aviation history. In the original project it was developed specifically for the US Navy, but it was used by all US forces and achieved significant commercial success worldwide. The F-4E version, developed specifically for the US Air Force, has an M61 Vulcan cannon in the nose and can be armed with AIM-9 Sidewinder and AIM-9 Sparrow air-to-air missiles to carry out air superiority missions. Thanks to its two powerful General Electric J-79 jet engines, the F-4E was able to reach a top speed of 1,240 knots. Speed, thrust and reliability were the Phantom II's strengths, which successfully compensated for its reduced manoeuvrability due to its large dimensions.

Details- Scale: 1:48- Age recommendation: from 14 years Technical data- Length 400 mm Contents- Kit- Decoration- Instructions Information- The high-quality kit from Italeri must be assembled by the customer.- The independent assembly is accompanied by step-by-step or illustrated assembly instructions. - The assembly instructions are of course included in the scope of delivery.- Based on the assembly instructions, the precisely fitting individual parts must be assembled. - The parts can be painted according to your own ideas.- Tools, glue and paint are not included with the plastic kit.
