from **388,01 EUR**

Item no.: 371000
shipping weight: 3.00 kg
Manufacturer: TAMIYA

Product Description

The TAMIYA "Gallant Eagle" tanker trailer in US style is a typical representative of the type used for transporting fuel in North America. The stainless steel tank is polished and sits on an aluminium 2-axle frame with kingpin. The trailer supports retract automatically when coupled. The running gear has 2 rigid axles with metal leaf spring assemblies, trailer tyres and chrome-plated rims, and the mudguards are also chrome-plated. Further details such as chrome-plated ladder, chrome-plated bumper, chrome-plated stowage pipes for refuelling hoses, wheel chocks and large mud flaps round off the look of the TAMIYA "Gallant Eagle" tanker trailer kit. The tanker trailer can be retrofitted with the lighting unit for trailers (item no. 300056502) and the electric trailer supports (item no. 300056505). The supports are then controlled via a free channel on the remote control system. The lighting unit for the trailers is compatible with the MFC-01 for tractors and all necessary connections are included in the scope of delivery. Warnings: You should have read and understood all instructions before starting assembly. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years of age.
