from **198,12 EUR**

Item no.: 369259
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

Simple drifting fun for everyone! With the TAMIYA Skyline R33, Tamiya presents an entry-level drift model based on the TT-02 chassis in a special "D" Drift-Spec version. The kit includes numerous tuning parts and special Drift-Tec tyres. By simply converting the tyres, the model can also be used as a road touring car. The R34 is the fifth generation of the legendary Skyline GT-R models and was presented at the Tokyo Motor Show in 2005. The Z-Tuned version was an extremely impressive powerhouse and was built by Nissan's own motorsport division NISMO. The engine was a 500 hp 2.8 litre with 8,000 rpm. Only 20 of the original were built. With the TAMIYA R34, every Skyline fan can now drive such a race car! Required accessories: Remote control with receiver, steering servo, 7.2V NiMH battery pack, charger, paint for Lexan body (TAMIYA PS-) Warnings: Before you start assembling the model, you should have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years of age.

Details:- Scale: 1:10- Age recommendation: from 14 years Technical details:- Detailed polycarbonate body (incl. window masking film for painting) - Robust TT-02D chassis (drift tuned) - CVA oil pressure shock absorbers - Ball bearings - Aluminium engine polycarbonate body (incl. window masking film for painting)- Robust TT-02D chassis (Drift Tuned)- CVA oil pressure shock absorbers- Ball bearings- Aluminium engine cooler- Drifttech tyres- 4WD cardan drive with protected drivetrain- Incl. electronic speed controller- Powerful 540 SPORT TUNED engine- Numerous TT-02 tuning parts available separately Technical data:- Wheelbase 25.7 cm Contents:- 4WD kit model in 1:10 scale- Vehicle- Decoration:- TT-02D chassis/tub frame chassis- Electr. Speed controller- 540 Sport Tuned engine- Polycarbonate body with add-on parts- Cardan drive,- Oil-pressure dampers- Independent suspension- Drifttech tyres, ball-bearing- Instructions
