300058710 - RC Car, 1:10 RC Hotshot II Blockhead Motors

from **223,85 EUR**

Item no.: 369235
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

The reissue of the Hotshot II (58062) released in 1987 comes in this version in the "BLOCKHEAD MOTORS" design! The Hotshot II was one of the first 4WD buggies from TAMIYA and has not yet been reissued. This model is the second variant from the Japanese designer Jun Watanabe from the "BLOCKHEAD MOTORS" forge after the 58695 Wild One. The model is based on the 58062 model with a few changes: New decals and an adapted design to the buggies of the 80s. The body is made of polycarbonate and is already cut out and pre-painted in a Brilliant Blue. The kit still needs to be assembled and a powerful 540 electric motor is included. The CVA II oil pressure shock absorbers are installed as in the original model: One transverse damper on the front axle and 2 vertical dampers on the rear axle. The drive is via a 4WD cardan drive and the wheels have independent suspension. **WARNINGS** Before you start assembling the model, you should have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads.
