Product Description

Harvester - 154 Components

Harvester take over several work steps during the grain harvest, so that they are indispensable in agriculture. At Ugears, we thought it was time to honor this impressive machine with a model. In the miniature vehicle, the refined interaction of the mechanics comes into its own.

Equipped with a rubber pull-back motor, the combine can be started by moving it backwards. It is also possible to turn its large gear to get its wheels rolling automatically. However, the model not only drives: At the same time, like the original, the reel turns. The machine can be braked with a lever.

A beautiful look is always important to us for our models. Every little detail is carefully worked out and an artistic overall picture is created. If driver's cab with seat, cutter bar, grain tank and further details: The replica of the agricultural machine is an extraordinary decorative object, suitable for the desk, for example. A small hidden compartment can also be opened using a lever.

Warning! Not for children under 3 years.

- Number of components: 154
- Setup time: 2 hours
- Model size: 27.4 x 16.5 x 13.3 cm
