Product Description

Steam Locomotive with Tender - 443 Components

Railway enthusiasts and collectors will rave about this artful creation by Ugears. Even those who are fascinated by old machines will enjoy this detailed replica of a locomotive. In the 19th century, the steam locomotive and with it the railway started its triumphant advance. Our lifelike model with many mechanical functions is a nod to this world-shaking invention. The size of the Ugears locomotive is also something special: the length is 31.5 cm.

A sophisticated mechanism is one of the unmistakable characteristics of our models. The can be set in motion steam locomotive through a rubber band motor connected to multiple gears. In addition, the coupling rods and connecting rods as well as the pistons can be observed in their function. Our steam locomotive is towing a tender behind it: this, too, is reminiscent of the original from historic times, as fuel and water were transported in the wagon. With its numerous, carefully crafted details that fit together harmoniously, the kit model is also unique in decorative terms.

Warning! Not for children under 3 years.

- Number of components: 443
- Setup time: 10-12 hours
- Model size locomotive: 31.5 x 10 x 12.5 cm
- Model size tender: 16 x 9 x 11.5 cm
